

The Shovel Tray

Lamson Engineering NZ Ltd is pleased to introduce a new product to our range of van shelving, the Shovel Tray. The Lamson Shovel Tray, contains the mess of dirty shovels, spades, plumbing poles and gumboots and stores long equipment & conduit. Made from sturdy pre-galvanized steel right here in NZ, the shovel tray is just like our other van shelving, built to last. It is designed to fit neatly under the VK5FR frame on the drivers side of the vehicle. It is easy to install and simply tek screws into the floor.

Dimensions:
1950mm long x 400mm wide x 100mm tall
