

LAMSON Van Kits Vertical System

Lamson Van Kits fit all popular service vehicles. Strong and durable, the Kits use an arrangement of semi open-fronted plastic bins and heavy duty general purpose trays to provide adjustable, neat, efficient and practical storage for tools, spare parts, manuals and maintenance records.

Each plastic bin hooks securely to the rear panel of the steel trays for guaranteed stability in a moving vehicle, and a simple hook-on connection ensures all sizes and types of steel trays can be adjusted vertically in seconds.

Standard arrangements of trays and Plastic bins are available to suit most requirements. However, the Kits can also be tailored to your own specific needs .

- ◆ Better customer service.
- ◆ Better control of the spare parts inventory.
- ◆ Increased space within the vehicle.
- ◆ Easy transfer from one vehicle to another.
- ◆ A neat, tidy, strong, compact and quiet solution.
- ◆ Very simple to install.
- ◆ Efficient use of time.
